

Bachelor of Child Studies-Post Diploma Option

ELCC/CYCC Diploma graduates:

- Receive up to 60 credits from your completed diploma
- May enter directly into the last 2 years of the degree
- Participate in a leadership practicum and capstone project building on your current professional knowledge and experience
- Enhance your understanding of brain plasticity (neuroscience of the brain), mental health strategies, applied research and program design

As of January 2016

Flexible delivery options, such as an evening course will be offered to students. A minimum of one course per semester will be offered outside of the typical class hours, to encourage students with outside commitments, to continue their education.

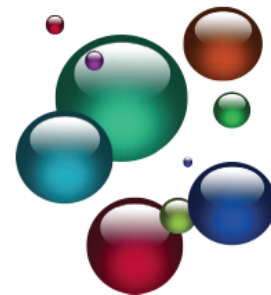

Learn how to work from an interdisciplinary perspective and provide leadership to your professional community while building upon the level of knowledge within your discipline.
